QUALITY YOU CAN TRUST

Hoppt 24" Edge Trowel

The Edging Trowel is designed for finishing right up to the edges of walls, protruding pipes and columns. Helps to minimize the need for manual edge work and improves the ergonomics for site workers.

FEATURES

- The cast alloy free rotating ring with rubber protector allows the machine to run up to the edges without damage.
- Precision engineered gearbox to transfer maximum torque to the trowel rotor
- High strength foldable handle for easy storage without compromising comfort and control
- Easy access to pitch and engine controls
- Available in 24" & 30" models

Specifications	TOL60G
Dimension - LxWxH (mm)	1,510x630x1100
Guard Ring Diameter (mm)	630
Operating Weight (kg)	56
Handle Type	Foldable (Half fold) Dimension: 700 x 630 x 700
Finishing Blade Size (mm)	230X120
Max. Blade Pitch Angle (°)	15
Blade Operating Speed (rpm)	85-135
Engine Options	Honda GX160 @ 3.6kW (4.8hp) 4-Stroke Petrol
